

Your open chairside solution

3Shape TRIOS Design Studio® – offer single-visit dentistry with your choice of seamlessly connected manufacturing solutions.

TRIOS Design Studio allows AI driven design and the milling of crowns, inlay/onlays, bridges and veneers right in your practice. This enables you to do more, gain profitable in-house production options, and exceed patient expectations.

Scalable and cost-efficient

With our strong 3Shape TRIOS® scanner portfolio, a wide range of software apps, and an open choice of mills, you can scale the solution to match your financial and business needs.

Open system with your choice of mills

An open system allows you to choose a Trusted Connection integration with the newest state-of-the-art mills or any mill with open .STL output.

One solution for both in-house and send-to-lab

Choose the integrated workflow that suits you and your patients best: design and produce in-house or send to your preferred lab.

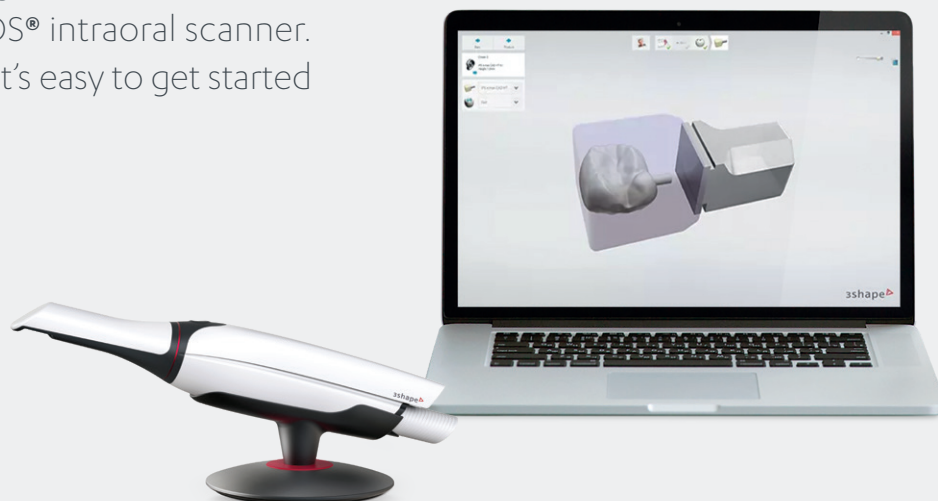

Flexible workflow integration with **Trusted Connection** mills

Trusted Connection mills enable a seamless workflow integration in 3Shape TRIOS Design Studio®. Milling parameters and settings are tested and validated for all relevant materials and indications to ensure consistent high-quality restorations.

Made possible by 3Shape **TRIOS**

The TRIOS Design Studio digital workflow is made possible by the 3Shape TRIOS® intraoral scanner. With TRIOS in your practice, it's easy to get started with chairside restorations.
